

DATACOM Sphere

Corporate Website

Solution

Datacom Sphere offers a corporate website template optimised for local government.

The template features fully responsive design, meaning content is shown in an optimal way for the device being used, be it PC, tablet or phone.

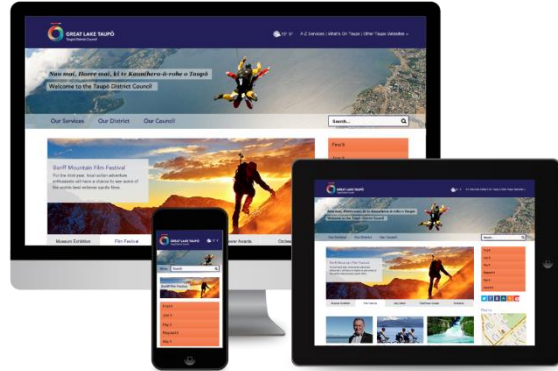

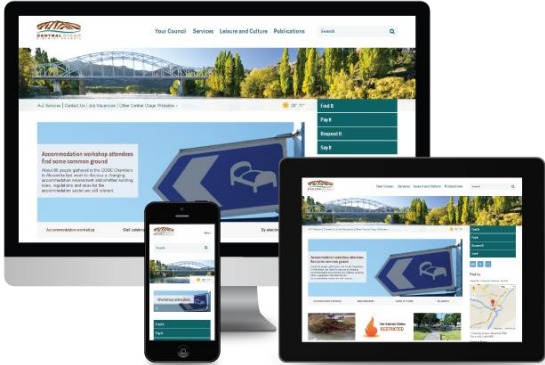

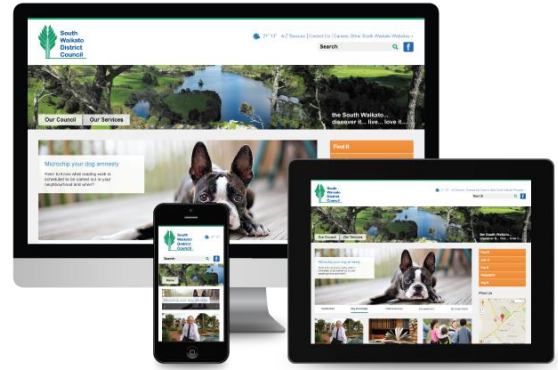

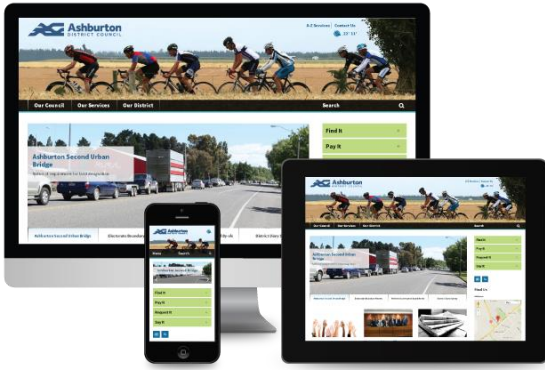

Datacom Sphere is a fully cloud based solution, with one simple monthly fee covering hosting, DR (in a different city), support and maintenance releases. There are no capacity limits and guaranteed availability.

Benefits

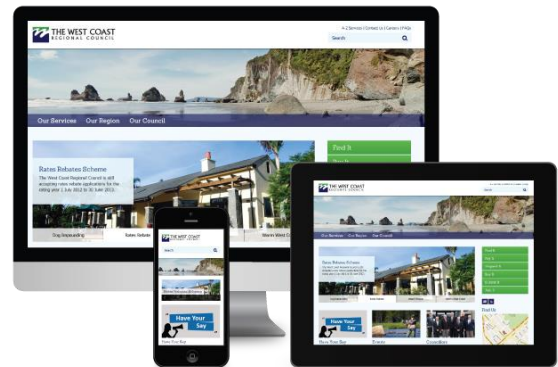

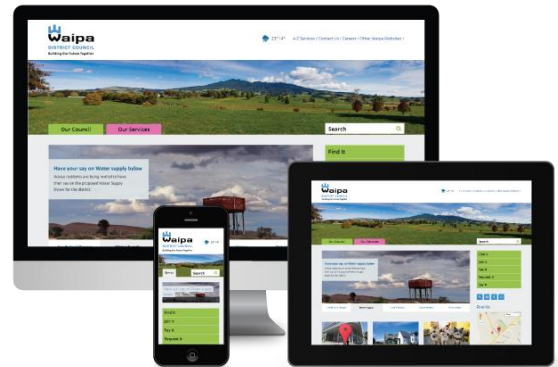

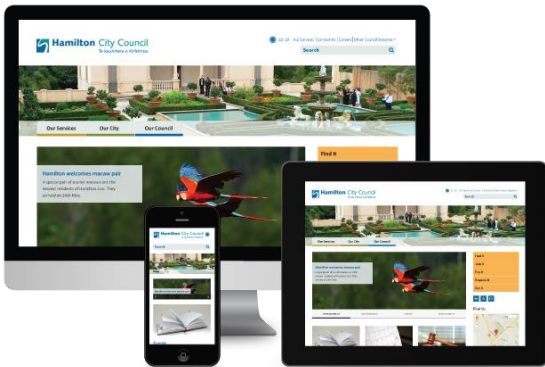

The template has been implemented and tested at 12 councils (at time of writing). This means a proven, low cost, low risk project with a guaranteed result.

Content authoring offers all the features you would expect, including approval workflows, set publish and expiry dates and times, and automated content review alerts.

The shared model means all Councils benefit from new features without having to fund individually, with a strong user group having input to the roadmap.

All the sites shown on this page use the same template, and are hosted in Datacom's multi-tenanted SaaS environment.
